Education

G.L. Bajaj Institute of Technology and Management July 2022 – June 2026
B.Tech in Computer Science and Artificial Intelligence (CSAI) *Greater Noida, India*

- **CGPA:** 7.60/10

Experience

AI Software Engineer – Ethara AI *September 2026 – Present*

- Build and maintain Python-based RL environments and multi-step task suites to train and evaluate tool-using LLM agents for frontier AI labs.
- Develop automated evaluation pipelines combining programmatic verifiers, rubric-based scoring, and LLM-as-a-judge grading to assess correctness, instruction-following, and safety across **1,000+ tasks**.
- Engineer agent harness components, including tool schemas, sandboxed execution, trajectory logging, and graders, to make agent runs reproducible, debuggable, and verifiable.
- Create and review SFT and RLHF preference data, developing QA scripts that flag inconsistent samples and reduce manual review effort by approximately **30%**.
- Collaborate with research and QA teams to analyze model failure modes and refine task design, improving grader agreement with human reviewers to **90%+**.

Cybersecurity Virtual Intern – AICTE & Palo Alto Networks *Sep 2023 – Nov 2023*

- Completed a **10-week cybersecurity virtual internship** administered by AICTE's NEAT Cell and EduSkills, supported by Palo Alto Networks, covering network security, threat detection, and cloud security fundamentals.
- Executed hands-on labs applying secure networking protocols and cybersecurity best practices, reinforcing enterprise-grade security implementation skills.
- Strengthened secure application development and cloud security proficiency through guided, industry-aligned assignments and projects.

Projects

LedgerLoop – Explainable Payment Reconciliation Platform | GitHub | Live Demo |*JavaScript*, *React.js*,*Docker*, *Node.js*, *Express.js*, *MongoDB*

- Built a reconciliation workspace for a small online seller that lines up orders, gateway payments, and bank-statement lines, and explains each suggested match before it is treated as confirmed.
- Designed a rules-based matching engine that auto-confirms exact references and settlement nets, keeps nickname, split-transfer, and instalment matches as suggestions, and flags duplicates, missing refund debits, unpaid orders, and fees above the contract.
- Implemented an exception inbox with owner, status, notes, and follow-up drafts, plus an audit log of confirmations, rejections, and CSV imports. One login can keep a separate set of books for each store.

BookVault | GitHub | Live Demo |*React.js*, *Node.js*, *Express.js*, *MongoDB*, *JWT*, *bcrypt*, *Context API*, *Axios*, *Tailwind CSS*

- Engineered a full-stack MERN application with **JWT-based authentication** and bcrypt password hashing, implementing **7 RESTful API endpoints** across authentication, book management, and protected routes.
- Designed **2 MongoDB collections (Users, Books)** with user-specific data isolation and built a responsive dashboard supporting book status tracking and tag-based filtering across **25–30 book records**.
- Built **4 reusable React components** across 3 pages (Login, Signup, Dashboard), using Context API for centralized state management; deployed via Vercel, Render, and MongoDB Atlas.

Technical Skills

- **Languages:** C++, Python, JavaScript, SQL
- **Software Engineering:** Data Structures & Algorithms, OOP, REST APIs
- **Systems:** Operating Systems, Computer Networks, System Design, STL
- **Backend & Databases:** Node.js, Express.js, PostgreSQL, Kafka, MongoDB, MySQL
- **Frontend & Tools:** React.js, Docker, Kubernetes, Git
- **AI/ML & Agents:** LLMs, Agentic AI, RL Environments, SFT, RLHF, A/B Testing, Agent Evaluation, PyTorch, TensorFlow, Prompt Engineering

Achievements

- Solved **400+ DSA and programming problems** across competitive coding platforms.
- Achieved a **3-Star CodeChef rating** with a maximum rating of **1644**.
- Completed the **Cisco Python Essentials 1** certification from Cisco Networking Academy.
- Completed the **Zscaler Fundamentals of Cybersecurity** certification, strengthening knowledge of cloud security, secure networking, and cybersecurity fundamentals.
